GRANT FUNDING

VISN 5 VA Capitol Healthcare Network MIRECC. Suicidality among patients with psychosis, **Peter L. Phalen, PsyD** (Principal Investigator), \$24,089 (total direct costs), 09/01/19-11/30/20.

The goal of this project is to gain insight into the nature and course of suicidality in psychosis and identify potential treatment gaps. Part one is a quantitative assessment of suicidality in people with psychosis and its relationship with theoretically important constructs including emotion dysregulation. Part two is a qualitative component to understand how emotion dysregulation is currently addressed in treatment for people with psychosis and identify potential treatment gaps.
